

# SOYBEAN MEAL

Soybean Meal is highly palatable and one of the highest available protein feeds on the market. Soybean Meal is a cost-effective way to add protein to your beef ration.

**Soybean Meal** is the by-product of the extraction of oil from soybeans and is a high protein feed with an excellent level of bypass protein, assisting hind gut fermentation. High in protein and energy with a good amino acid profile, Soybean Meal is one of the world's most widely used protein sources in beef cattle rations.

#### Feeding recommendation:

Soybean Meal is suitable to feed during any stage of the farm cycle when protein is deficient in the diet. It is important to ensure proper transition over an extended period and access to quality fibre.\*

#### Storage:

Store in a dry area to maintain quality. Moisture contact can cause growth of moulds and toxins. Precautions should be taken against rodents and birds.

\* It is recommended that independent advice is sought when feeding supplements.

#### TYPICAL ANALYSIS:

Energy (MJME/kgDM)	12.5
Protein	47%
Dry Matter	88%
Starch	1.6%
Crude Fibre	3.5%
NDF	8.9%

\* All product is heat treated to DAWR standards before entry to Australia.

\* Product may be derived from GMO soybeans and have variances from above typical analysis.
