

# CORN GLUTEN FEED (CGF)

Rich in protein, highly palatable and high in energy, CGF is gaining a reputation as a versatile, multi-purpose cattle feed.

CGF is the base product for numerous beef rations around the world. With solid amounts of protein and energy in pelletised form for added flowability, this product is ideal for paddock or feedlot blends. It offers medium protein and high energy, consisting of a grain fraction and whole stillage. For ruminants, this palatable, low-starch product is high in rumen degradable protein, B vitamins, phosphorus and highly digestible fibre.

#### Feeding

##### recommendation:

CGF is suitable to feed during any stage of the farm cycle when protein is needed in the diet. Requirements will depend upon your farming system.

##### Storage:

Store in a dry area to maintain quality. Moisture contact can cause growth of moulds and toxins. Precautions should be taken against rodents and birds.

\* It is recommended that independent advice is sought when feeding supplements.

#### TYPICAL ANALYSIS:

Energy (MJME/kgDM)	12.7
Protein	21%
Dry Matter	90%
Starch	8%
Fat	3%
NDF	33%
Crude Fibre	10%

\* All product is heat treated to DAWR standards before entry to Australia.

\* Product may be derived from GMO corn and have variances from above typical analysis.
